# COMPANY HISTORY

We're becoming the leading supplier of technology in the Integrated Product Support (IPS) field

LINETECH ENG IS..

## Basic Information

CEO

Joo-Soo, Kim

Established Year

1995

## Organization

7%  
Management Support/Others

R&D Personnel

93%

## Business

Business Area

**IPS**

(Integrated Product Support)

Expert

## Office

Headquarter, Changwon

# COMPANY HISTORY

We're becoming the leading supplier of technology in the Integrated Product Support (IPS) field

## HISTORY

STEP  
01

Started as Integrated Logistics Support (ILS) service provider

STEP  
02

Becoming the Integrated Product Support(IPS) expert

**1995** Established LineTech Engineering

**1995** Registered as S&T Heavy Industry Co., Ltd. cooperator

**1996** Registered as Hanwha Defense cooperator

**1998** Passed the security measurement

**1999** Registered as a member company of Hanwha Defense Cooperators Association

**2000** Joined the Korea Defense Industry Association as an associate member

**2006** Moved the office (Sapa-dong, Changwon-si)

**2013** Acquired ISO 9001 Certificate

**2014** Opened a new office(in Daebang-dong, Changwon-si)

**2018** Converted to a cooperation (LINETECH ENG Co., Ltd.)

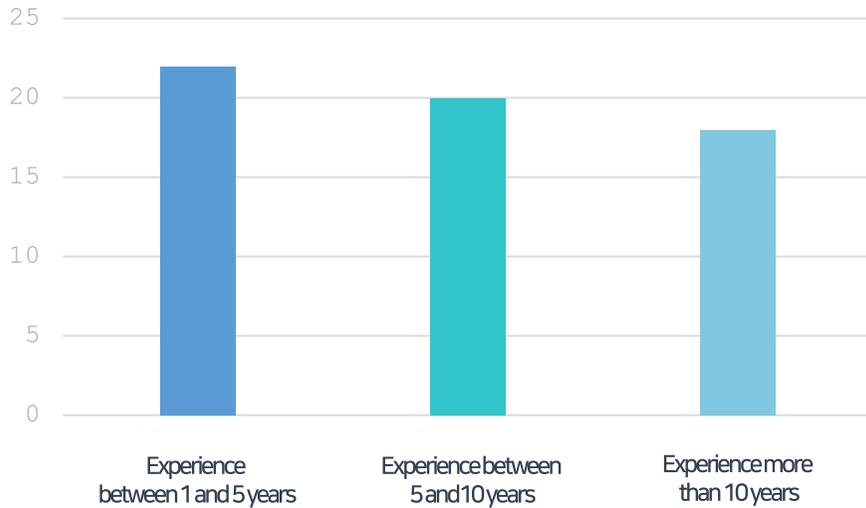

**2019** Established R&D Institute

**2021** Relocated to a new office building (LINETECH ENG Co., Ltd.)

# Organization

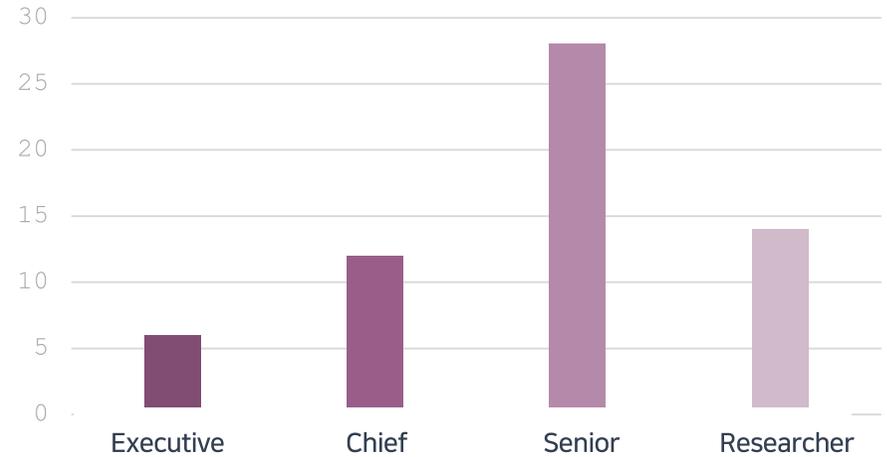

IPS experts based on the weapon system Integrated Product Support(IPS)  
development experience and R&D organization

## IPS Experiences

Experience Category	Count	Percentage
Experience between 1 and 5 years	22	36%
Experience between 5 and 10 years	20	34%
Experience more than 10 years	18	30%
<b>Total</b>	<b>60</b>	

## Job Position

Job Position	Count	Percentage
Executive	6	10%
Chief	12	20%
Senior	28	46%
Researcher	14	24%

# HOLDING TECHNOLOGY

Holding specialized technology in the IPS field

## Holding Technology

# IPS(Integrated Product Support)

Development of IPS Elements Based on Rich Practical Experience and Professional Technology

## IPS Elements Development of Weapon System

### Naval

- Integrated Sonar System
- Optical Gyroscope
- Heavy Transport Vessel ECS
- Logistics Support Vessel Reduction Gear

### Space & Air

- CHUNGooNG Guided Missile Loading System
- CHUNGooNG Hydraulic System
- KUH-1P Auxiliary Fuel Tank
- SIDAS
- RC-2000B Aircraft for Information and Electronic Warfare

### CBT/IETM

- Division level Unmanned Aircraft(aerial) System(DUAS)
- K21 Armored Fighting Vehicle
- Smoke Generating Vehicle

### Export

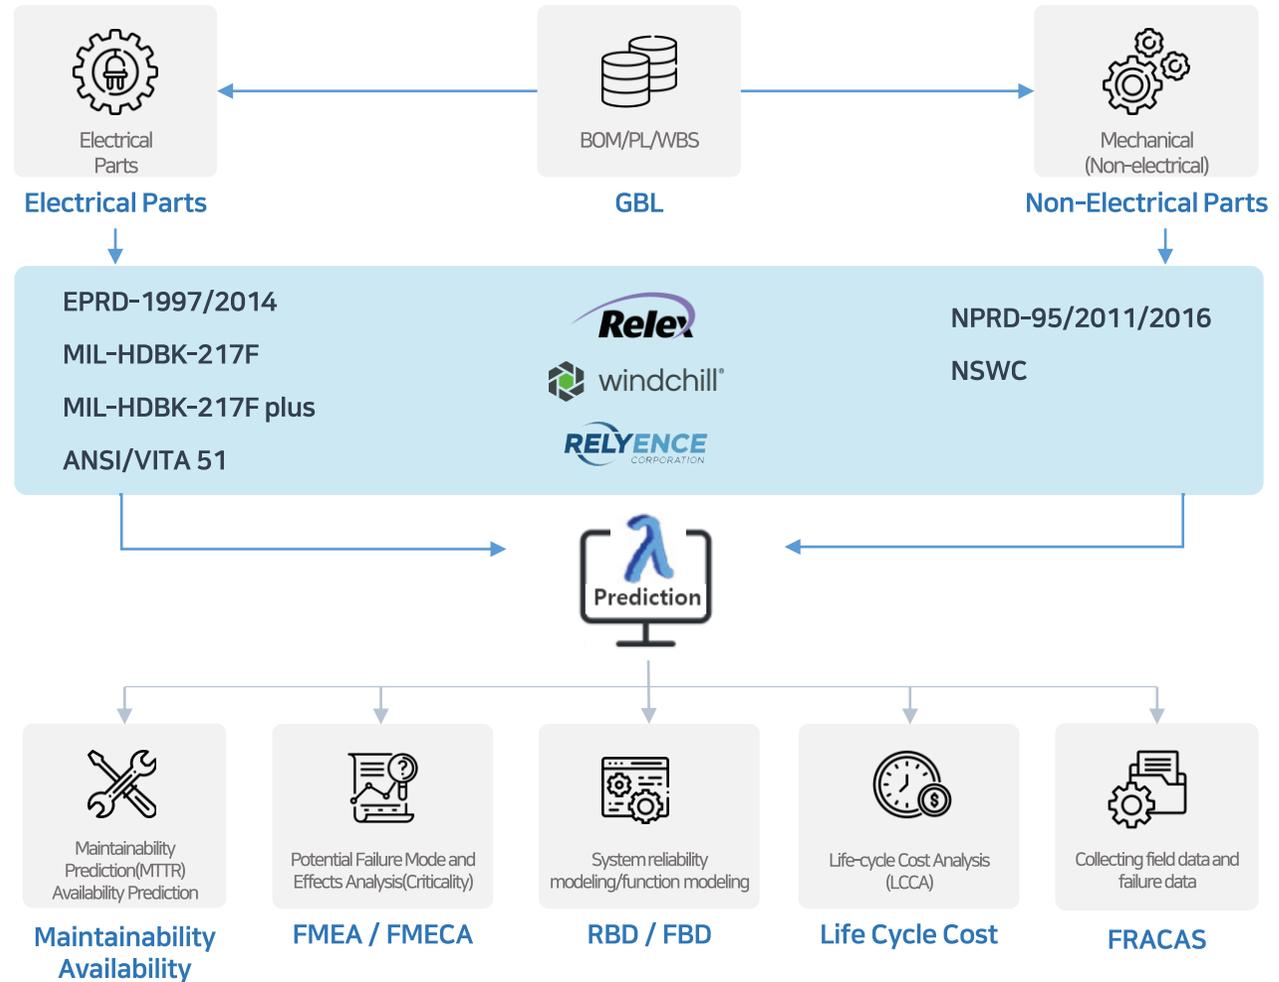

- Indonesia Export Vehicles
- REDBACK(LAND 400)
- CHUNGooNG Export
- CHUNMOO Export
- LAND 8116
- OMFV

### Land

- 501/502 Launcher
- 120mm Self-propelled Mortar
- NBC Reconnaissance Vehicle -II(NBCRV) (armored/vehicle type)
- K21 Armored Fighting Vehicle
- Next generation Recovery Vehicle
- L-SAM Loading System
- Division level Unmanned Aircraft(aerial) System(DUAS)
- 901 Launcher

# RAM Analysis

## RAM Work Process

## RAM

Reliability  
Availability  
Maintainability

# RAM Analysis

## RAM

### 01 System Analysis (Mechanical/Electrical/Electronic)

- Electrical/Electronic Circuit Analysis
- Technical data analysis and understanding

### 02 Core Technology for RAM Analysis

- Planning RAM management/ Calculating system failure rate
- Parts Count Method(PCM) / Parts Stress Analysis(PSA)
- Mechanical Parts Reliability Analysis
- Selecting Pi-Factor
- Reliability S/W
- Analysis by mission type/system operation

### 03 Data Base for RAM Analysis

- Holding the RAM data calculated in the previous projects(Army/Navy/Air Forces)
  - RAM task/analysis plan
  - RAM / RAM-D analysis report / reliability worksheet
  - Reliability growth management plan/life cycle analysis data
- Technical data(Catalog) DB for each part
- Searching for similar data in the PCM/PSA calculation
- Managing the Part Data Sheet

### 04 Study on analysis standard and trend in the R&D Institute

- Research/translation of specifications related to the R&M
- Reliability Growth Tracking, RGA, FRACAS, 217plus, etc.
- Completed Maintainability Engineering Seminar (Business Capacity Reinforcement Project)
- Participated in various seminars/researches related to the reliability

### 05 Reliability Analysis S/W(Tool)

- Relax 7.7 / Relax2007 / Relax2011
- Windchill 10.1 / 10.3 / 11.0
- Windchill RBD / FTA Package
- OPUS 10

### 06 Various Analysis Experiences and Professional Manpower

- RAM analysis experts with over 20 years' experience
- A lot of experience conducting the RAM Verification/Validation and Test activities in the Maintenance Depot.
- RAM calculation/analysis/verification (Army, Navy and Air Force)

# PSA(Product Support Analysis)

## PSA(Product Support Analysis)

### Purposes of Product Support Analysis(PSA)

- To optimize elements required to support the product
- To minimize down time
- To simplify support product and optimize operation/maintenance(O&M) cost
- To store analysis data in a single database and specification feedback
- To identify, develop/acquire the PSA elements through the maintenance analysis

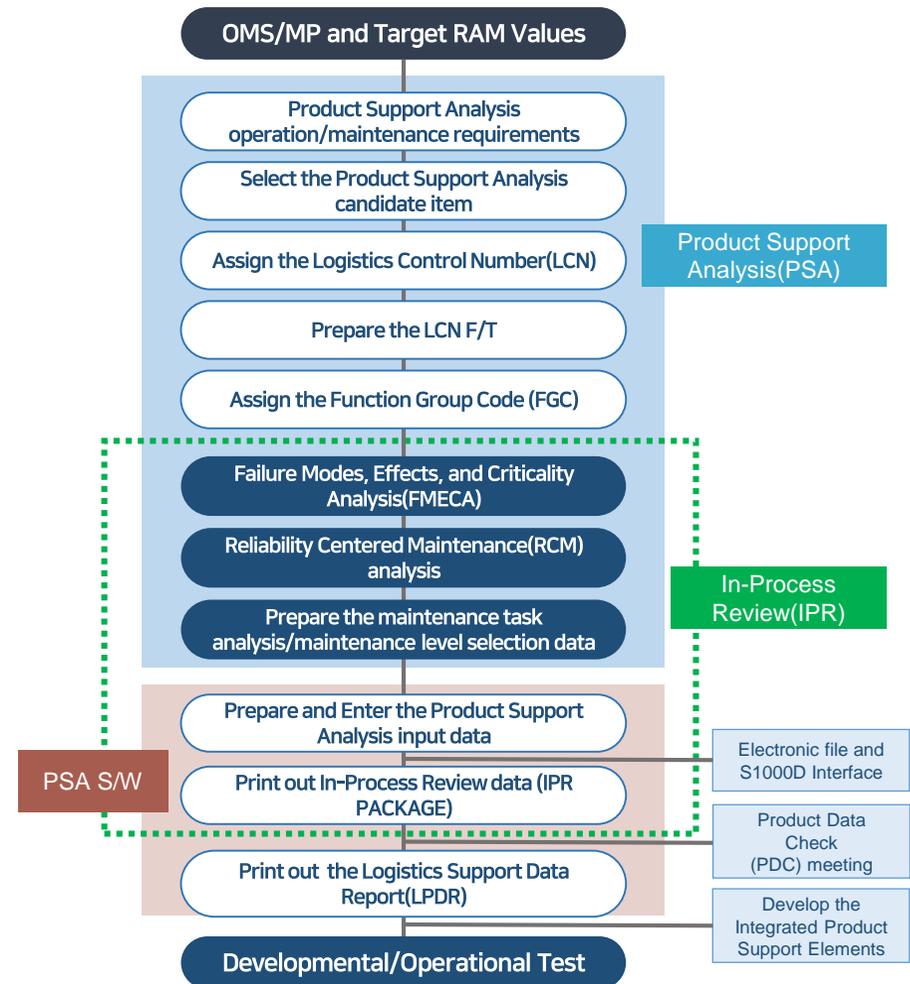

### Product Support Analysis(PSA) Task

- PSA management, supervision, control
- Supportability Goal
- Selection and evaluation of alternative
- Determination of the required product support resources
- Product operation management
- Conformity Assessment

### Core Technology

- Life Cycle Cost(LCC) Analysis
- Parts Obsolescence Analysis
- Level of Repair Analysis(LORA)
- FRACAS DB and reliability growth management analysis

## PSA(Product Support Analysis) Procedure

# Computer Based Training(VR/AR, CBT)

Holding professional technology in the Computer Based Training field

## Computer Based Training(VR/AR, CBT)

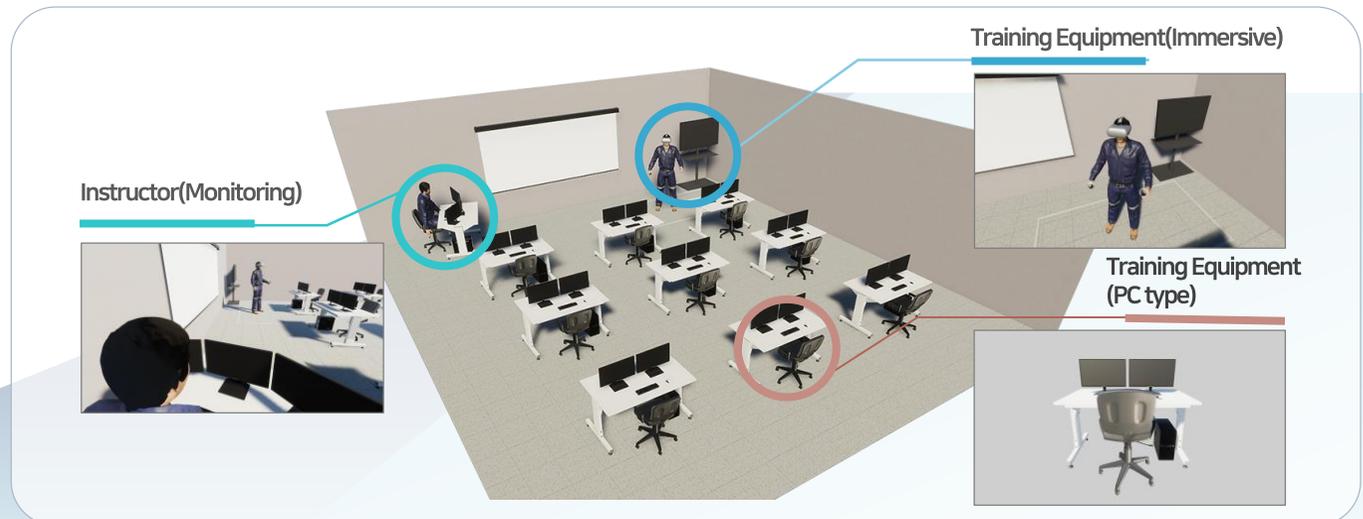

- Practical training of maintenance procedures
- Troubleshooting / Fault Isolation training
- Practical training of operating procedures
- Practical training of safety procedures
- Practical training of emergency procedures
- Equipment/System Layout study
- Practical training of removal/installation procedures
- Facility simulation
- Digital Mock-up

## Virtual Maintenance Training System

Virtual Maintenance Training System(VMTS) is a simulation-based training tool that provides a learning environment for maintenance technicians to gain practical experience of systems and maintenance tasks.

- Creating a simulated environment, similar to a real environment in 3D VR environment
- Simulating the operating state, failure and dangerous situation of equipment in a virtual environment
- Mastering maintenance procedures and troubleshooting/fault isolation procedures and repeated learning
- Maintenance training evaluation and Feed-back

# Defense Export Logistics Support

## Setting up the Infrastructure required to support defense export project

### 01 PLAN Detailed plan

- Export business plan based on existing experience
- Determination of the required human/material infrastructure
- Exclusive organizations dealing with each project/country

### 02 R&D Research and Development

- Specialized research and study on defense export business
- Research on various specifications and S/W operation for export business
- Study on the domestic SOLOMON enhancement project

### 03 ORGANIZATION Exclusively focused on export

- Organizations exclusively focused on export project
- Experience in export business and business link
- Fast adaptation for export business / Easy understanding

### 04 TRANSLATE Translation/interpreting

- Translations by expert translators
- Organization of translators with expertise in manual translation
- Extensive experience in technical manual translation

### 05 CAREER IPS experienced personnel

- Many employees with experience in developing IPS elements in Korea
- Many employees with experience in export business
- Many IPS development engineers who speak English fluently

### 06 SOFTWARE Export Business S/W

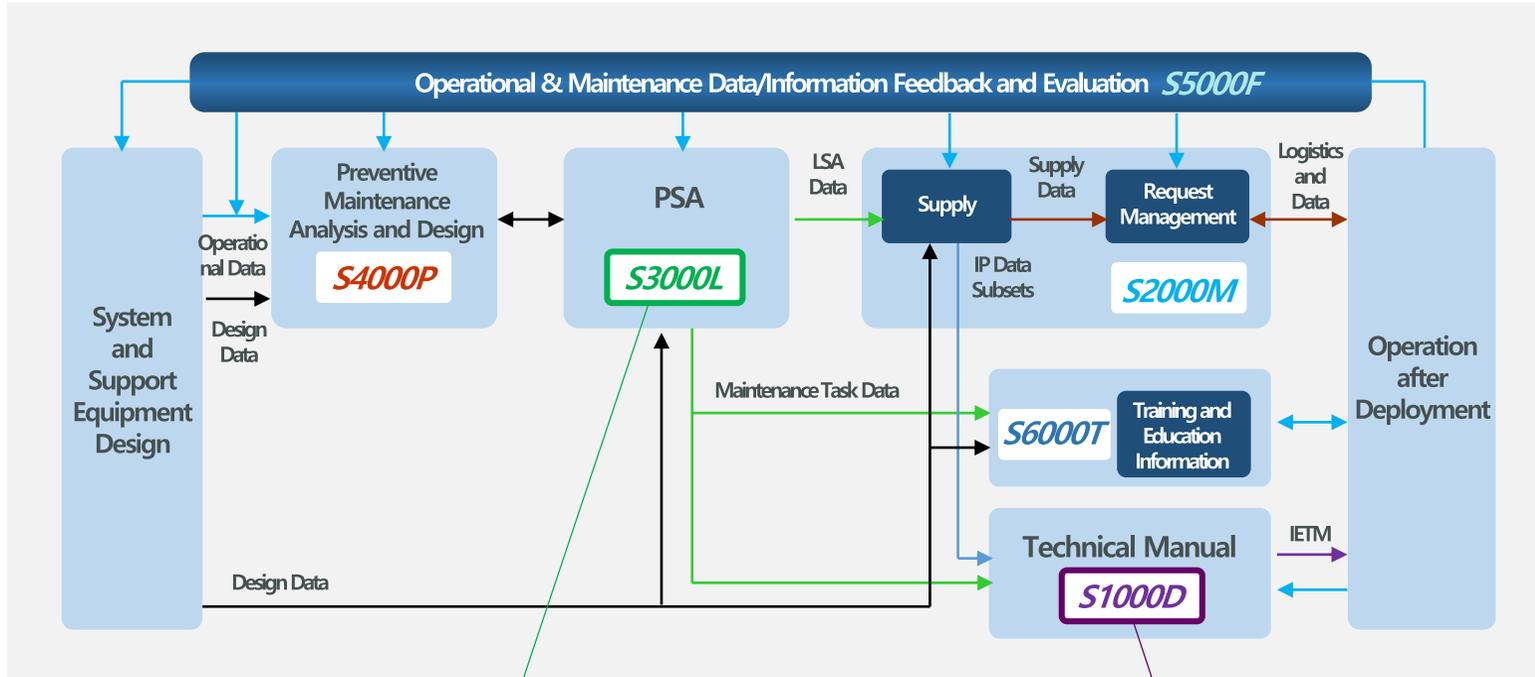

- EAGLE LSAR / PS (Raytheon)
- CONTENTA (PTC)
- CATIA / Windchill / RBD / OPUS10

### 07 PROCEDURE Export procedure

- Business procedures established through the export business plan
- To be applied/used to future export business

# Defense Export Logistics Support

Holding International Specification S-Series SPEC Operational Capabilities and Solutions

**S3000L**

**International Procedure Specification for Logistics Support Analysis**

A central role in maintaining/managing the basic product support data and the product maintenance concept during the entire life cycle of weapon system

Interface

↔

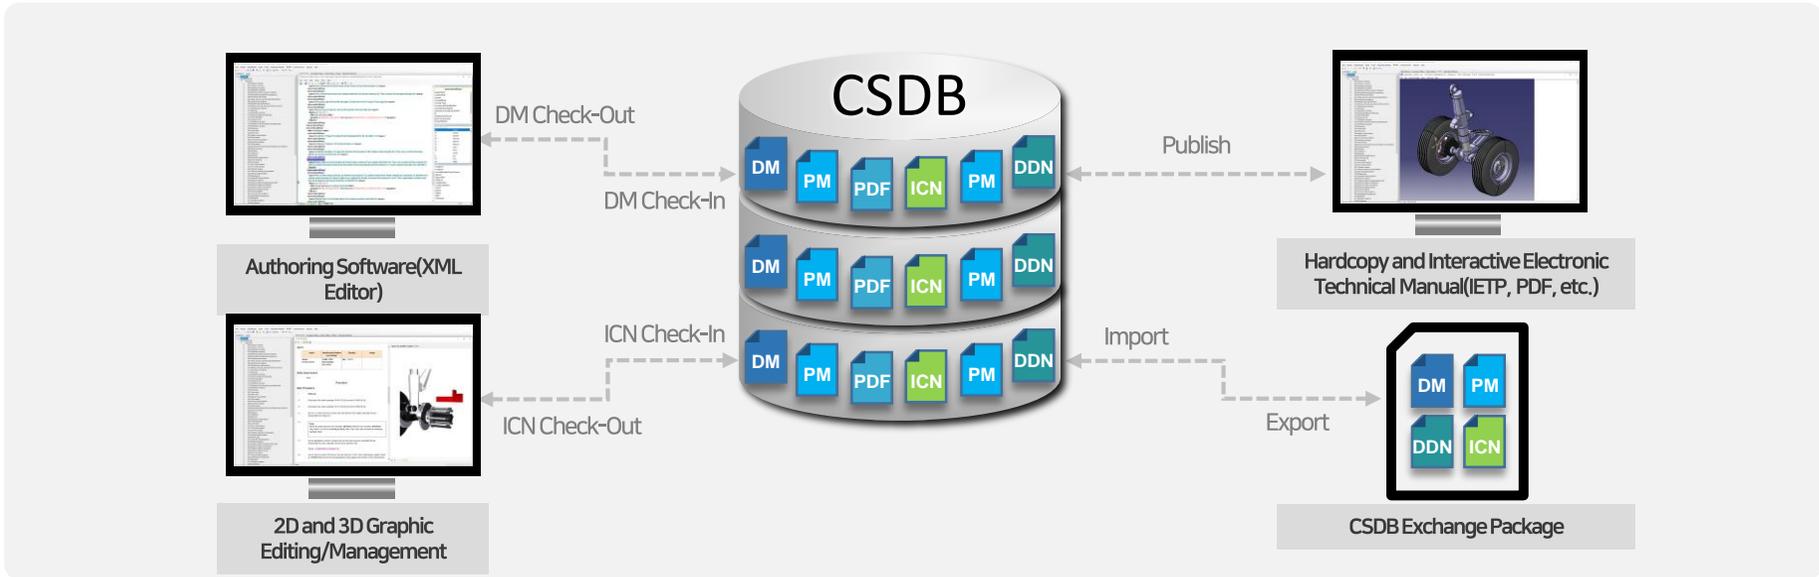

**S1000D**

International Specification for Life-Cycle of XML based Interactive Electronic Technical Publications(IETP) Utilizing a Common Source Data Base(CSDB)

Creating the hardcopy/interactive electronic technical publications based on the data of S3000L

# Defense Export Logistics Support

## S1000D Application Development and Solution & System Construction

## Technical Manual Development Process Based on S1000D

# Defense Export Logistics Support

## Technical Translation

### Understanding and analysis of text

- Data acquisition and analysis
- Plan the vocabulary/sentence applicable to each technical field
- Identify customer request

### Performance

- Vehicle exported to Indonesia
  - Vehicle exported to UAE
  - Chunmoo export (UAE)
- Chunmoo export(Saudi Arabia)
  - CHUNGooNG export(UAE)
  - REDBACK(Australia)
  - OMFV(USA)
- LAND 8116(Australia) and etc.

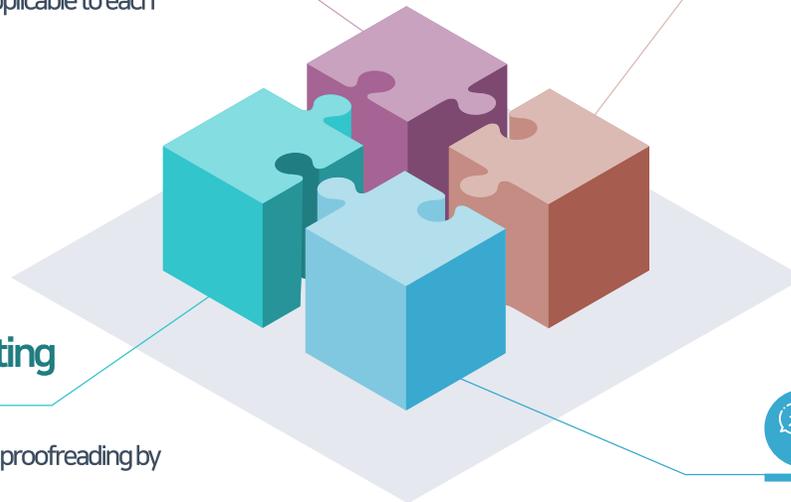

### Proofreading/Editing

- Technical proofreading and final proofreading by native speakers
- Check whether the applicable specification is applied
- Reflect customer's opinions and requests.

### Multilingual/Multicultural Translation

- Translation services in multiple languages
- Translation service considering the cultural implications for a translated text

## Holding Software(S/W)

**RELEX**

- System Reliability(Failure Rate & MTBF) Prediction and Analysis
- RELEX 7.7/RELEX Studio 2007/RELEX 2011

**windchill**

- System Reliability(Failure Rate & MTBF) Prediction and Analysis
- Windchill 10.1/10.3/11.0
- Windchill RBD/FTA Package

**SOLOMON**

- Logistics support analysis data input/output and management tool
- LSA data input/report generation
- Open software (Defense Acquisition Program Administration)

**OASIS**

- Initial CSP calculator tool after deployment
- Target operational availability setting/ economic feasibility optimization
- Open software (Defense Acquisition Program Administration)

**EAGLE LSAR**

- LSA data management/ analysis report generation software
- 5 International Specifications can be applied(S3000L, etc.)

**EAGLE  
EPS**

- Hardcopy/Interactive Electronic Technical Manual writing and publishing software using the DM of S1000D Specification
- Interface with the EAGLE LSAR software

**CONTENTA**

- Hardcopy/Interactive Electronic Technical Manual writing and publishing software using the DM of S1000D Specification

**OPUS10  
OPUS10**

- Total Life-Cycle Systems Management(TLCSM) satisfied, Spare Parts Optimization Analysis
- Maintenance Category and Level Optimization Analysis
- LORA analysis based on operating period and cost structure

**Auto CAD**

- Technical Manual Illustrations

**INVENTOR**

- 3D Modeling development and production
- Technical Manual Illustrations and multimedia production

**Adobe illustrator**

- Technical Manual illustrations and Multimedia production

**Reliasoft Weibull**

- Comprehensive life data analysis tool
- Reliability Growth Analysis(RGA) included

**Hangul**

- IPS elements development and QA tool
- Technical Manual/Reports, Etc.
- Hangul 2007/2010/2016

**MS Office**

- IPS elements development and QA tool
- IPS elements development analysis data management and generation
- MS-OFFICE 2003/2010/2016

**KAIS**

- Interactive Electronic Technical Manual(IETM) development tool
- Open software (Defense Acquisition Program Administration)

**CATIA V5**

- 3D modeling development and production
- Technical Manual Illustrations and Multimedia production

# Certification and Patent

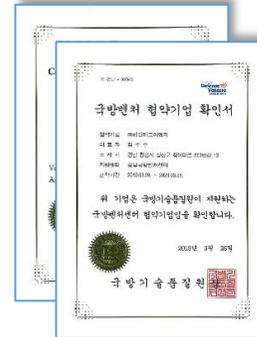

## Certification and Patent

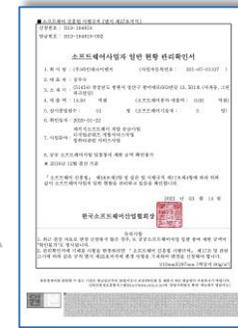

Notification of security measurement results  
(Defense Security Support Command)

Acquired Quality Management System Certification(ISO9001)

Defense Venture Confirmation  
(Defense Agency for Technology and Quality)

Reported software vendor  
(Software Industry Association)

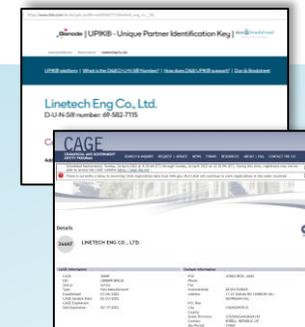

Small & Medium Enterprise Confirmation  
(Ministry of SMEs and Startups)

Certificate of company-affiliated research institute  
(Korea Industrial Technology Association)

Certificate of LSA automation patent  
(Korean Intellectual Property Office)

DUNS NUMBER  
(Global Business Identification Number)  
CAGE registered in the System for Award Management

# Security

## In-company Security System

### Technical Data Security Separation of Computer Network

- Network separation between the Internet area and the security area
- Separating networks into Internal work net(Intranet) and External net(Internet) ,Blocking external intrusion and hackers
- - Control the data transmission between the internet and the intranet and block the leakage of internal information
- In-company network(data transmission) system
- Reinforced security policy and Infrastructure

### Facility Security Access control for business facilities

- Real-time monitoring by installing CCTV systems outside the building
- Intrusion detection by installing the external infrared detector
- Access control using facial and fingerprint recognition systems.
- Visitor access control and management(keeping a log of visitors and issuing visitor passes)
- Security Company(S1 company) employed to ensure security at night(24-hour).

### Computer Security Control the Use of PC

- Block removable storage
- Disable Attachment of Internet Files
- Disable Export options of software file
- Web Site Access Control/Soft Execution Management

### Computer Security AntiVirus

- Protect all PCs from different types of malware attacks
- Powerful detection of malicious codes, Inspected and treated in real time.
- Protect the PC from malicious attacks

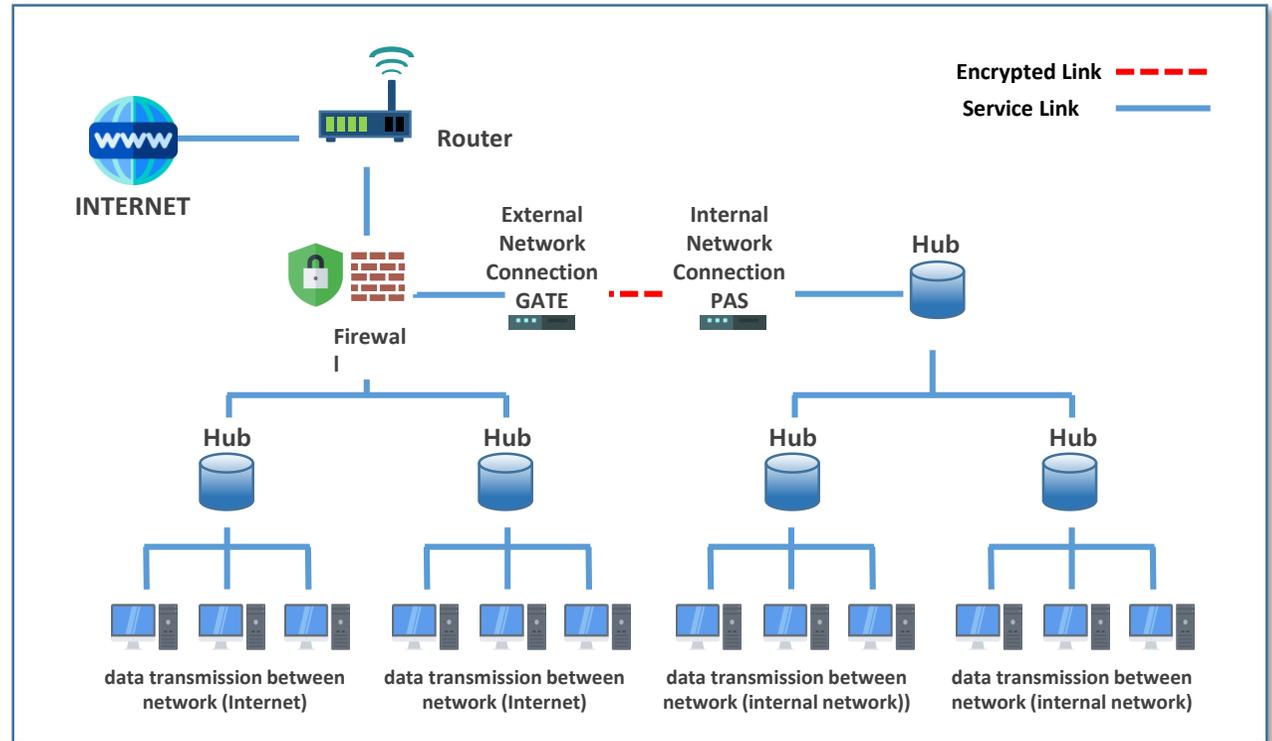

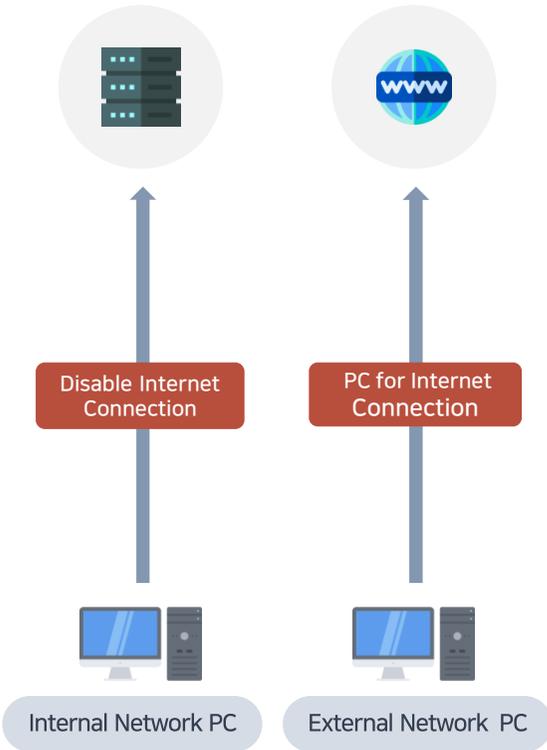

### Education on technical data security and protection

- Provide regular education and training to protect and secure the technical data
- Conduct security training twice a year

# Security

## Built the In-company Network/Internet Network Disconnection(Network Connection System)

Network Connection(Disconnection) System Diagram

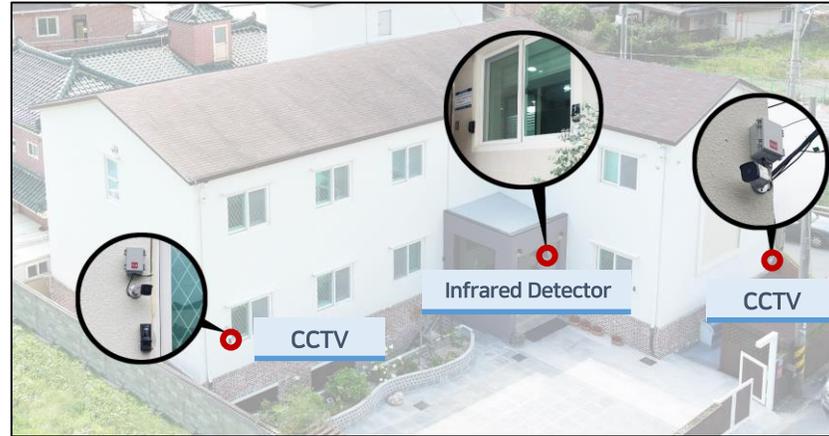

# Security

## Installed Security Equipment Inside/Outside the Building (Using S company's security system)

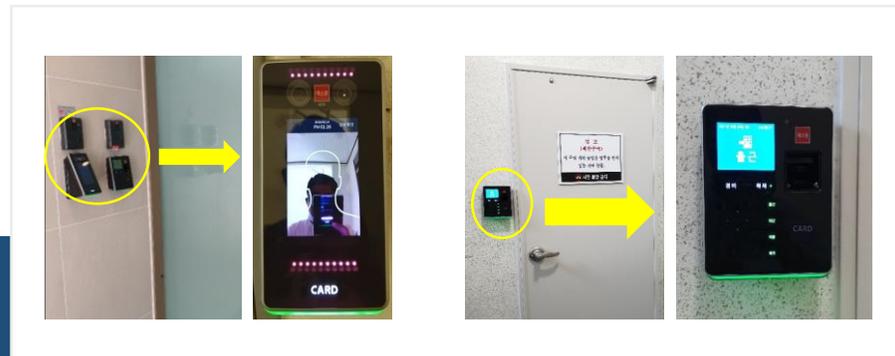

Installed security equipment inside/outside the building

## Access control (Using S company's security system)

Entrance inside/outside the building  
Installed facial and fingerprint recognition systems.

# Security

## Computer(Technical Data) Security

### Media Control

#### Disable removable storage

Disable copy and export to USB, external hard drive, smartphone, CD-ROM

#### Disable Attachment of Internet Files

Disable all Internet-based file attachments including mail, cloud, and web browsers, etc.

#### Disable Export options of software file

Disable Export to Messenger, Remote Control, Web Hard, etc.

#### Real-time/Automatic Scheduled Inspection

Inspect files containing sensitive data in all employee PCs in real time and at scheduled intervals.

#### Encryption/Decryption

Automatically encrypts any file found during inspection, or manually encrypts files before saving.

#### Document Export Control

Disable Export files using the media and Internet including USB, mail, web hard, etc.

#### Web Site Access Control

Categorize by site properties  
Control using Disable/Warning/Enable

#### Soft Execution Management

Categorize by S/W properties  
Control using Disable /Warning/Enable
